

Backup & Recovery-as-a-Service

Data is at the core of every business. With data volumes predicated to double in size every 18 months, never has it been more important to have a coherent solution in place to cater for the evolving needs of your business.

Brennan Backup & Recovery-as-a-Service provides a fully managed solution that delivers onsite hardware, connectivity and off-site data storage and replication, as a fully managed service, paid for on a monthly basis.

Meeting the needs of today's business

An essential element of any business's continuity and disaster recovery plan is the offsite backup and storage of data.

Maintaining 'hot stand-by' sites that provide full data de-duplication and back up, combined with the transport of physical media such as data tapes to off site locations is of ten fraught with risk and is a costly exercise for any business.

In today's changing economic landscape, with increased pressure on IT budgets, can your business justify the cost?

The smarter choice

Brennan Backup & Recovery-as-a-Service delivers a cost effective, secure and scalable solution to meet your data storage needs. Using proven technology, the service provides a step-up on traditional physical media solutions and offers access to a range of onsite hardware and connectivity types to cater for any volume of data.

Delivered as a fully managed service, Brennan Backup & Recovery-as-a-Service is securely integrated into your existing corporate network, maximising the utilisation of existing IT infrastructure while delivering faster data backup and recovery.

Delivered as a fully managed service, Brennan Backup & Recovery-as-a-Service is securely integrated into your existing corporate network, maximising the utilisation of existing IT infrastructure while delivering faster data backup and recovery.

With minimal or no up front capital expenditure and a simple, pay by month plan, Brennan Backup & Recovery-as-a-Service offers better value than traditional physical media solutions. The service typically delivers Total Cost of Ownership savings of between 25 – 35 percent when compared to do-it-yourself solutions and even as high as 40 percent compared to traditional tape services.

The benefits of Brennan Backup & Recovery-as-a-Service

Maintained by highly experienced and knowledgeable staff, Brennan Backup & Recovery-as-a-Service is fast becoming the new standard for off-site data back up, and here's a few reasons why:

- Funded as operational expense, not capital expense.
- Reduced management and operational overheads.
- Significantly increase the reliability of your backups, by reducing errors.
- Predictable monthly cost for the entire service.
- Back-up and recover entire environments in minutes rather than hours.
- Improved recovery time versus tape.
- Managed Off-site Disaster Recovery via WAN replication.
- Lower Total Cost of Ownership.
- Fully managed on-site hardware, WAN link and off-site data storage.

What do you get as part of this service?

- Installation and configuration of data de-duplication devices.
- Installation and configuration of primary back-up server.
- Installation and configuration of replacement back-up software.
- Configuration of back-up software to stage to disk with a defined retention policy.
- Configuration of data de-duplication replication between client site and Brennan data centre.
- Installation and configuration of secondary back-up server facilities in Brennan data centre.
- Specifying and installation of appropriate network connectivity between client site and Brennan data centre.
- Monthly storage of replicated business data.
