

IT Services

Technology Sourcing

As a specialist service delivery arm catering to customer's requirements for hardware & software products, the Brennan Technology Sourcing team has extensive product knowledge and experience across a very broad range of vendors.

By keeping our focus on a handful of core vendors, our consultants are able to offer industry leading technical expertise in the best possible products available.

Brennan is selective when choosing technology partners, maintaining only a handful of leading industry certifications. These include:

- Microsoft Gold Partner
- VMWare Authorised Consultant
- HP Premier Partner
- Cisco Premier Partner with Advanced Unified Communications specialisations
- Lenovo Authorised Business Partner
- EMC Premier Velocity Partner
- Citrix Silver Partner

IT Services

Technology Sourcing

The Technology Sourcing team is committed to delivering superior service to clients. Upon receipt of a request for quotation, standard quotes will typically be turned around within 4 hours.

Superior Service

The Technology Sourcing team is committed to delivering superior service to clients. Upon receipt of a request for quotation, standard quotes will typically be turned around within 4 hours. Complex solution quotes that involve a consultant will typically be turned around in 32 hours, allowing 24 hours for the technical vetting process to be completed, and up to 8 hours to quote all the relevant items.

For larger opportunities, after the quote has been technically assessed, we negotiate special pricing specific to the opportunity with our vendor partners. This process can take up to 72 hours.

Licensing & Compliance

We have acclaimed expertise in software licensing, which can help customers navigate the minefield of the different vendor licensing programs, ensuring customers acquire only the software they need, and maintain compliance.

Supply

Products are sourced from several major distributors, who have made large investments in logistics. This means you get your equipment faster, with goods being shipped directly from the supplier's warehouse. Brennan also facilitates online purchasing of software, from overseas if necessary, for all customers.

Rapid Order Processing & Delivery

Orders that are received by 2pm will be processed that day, and in-stock items are usually delivered the next working day to Sydney, Melbourne & Brisbane Metropolitan Areas. We can accommodate urgent orders so that they can be delivered same day.

Backorder Reports

The Team receives backorder reports, and follows up ETA dates with our suppliers. These backorder reports are collated in our backorder system, and are updated daily. Brennan Consultants & Account Managers have full access to the backorder system, and can ensure that you are kept up to date with the specific ETAs for your orders.

Staging Facilities

Hardware items such as desktops, laptops & servers can be delivered to Brennan, including hardware pre-assembly and configured specifically for use in your network. This results in less onsite time required by the consultant to integrate the hardware with your network, saving you time & money.

Single Source Services & Infrastructure

By utilising Brennan's technology sourcing division, via your Consultant or Account Manager, you now have a single source for all your IT requirements, and a dedicated team at Brennan ensuring you receive the best possible service.
