

# OFFICE 365 VS MICROSOFT 365

## What's the difference, and why should your business consider upgrading to Microsoft 365 with Brennan IT?

While Office 365 provides a range of powerful, relevant and familiar applications and tools, Microsoft 365 takes things to a new level – incorporating all of the features of Office 365, as well as Windows 10, and a range of vital enterprise security and mobility features.

What are the key differences? Take a look at this comparison:

		Office 365 Business Premium	Microsoft 365 Business
<b>Office applications</b>	Office accessible on tablets and phones	✓	✓
	Fully installed and web versions of Office apps	✓	✓

	Online meetings (instant messaging, audio and HD video chat/conferencing)	✓	✓
	Microsoft Teams chat-based workspace	✓	✓
<b>Business applications</b>	Outlook Customer Manager, Bookings, Listings*, Invoicing*, Connections* <small>*App is currently only available for customers in the US, UK and Canada</small>	✓	✓
	<b>Device management</b>		
	Single console to manage user and device settings		✓
	Self-service PC deployment with Windows AutoPilot		✓
	Automatically deploy Office apps to Windows 10 PCs		✓
<b>Security</b>	Protect company data across devices		✓
	Secure access to documents on mobile devices		✓
	Protect Windows 10 devices against malware, viruses and spyware with Windows Defender		✓
<b>Maximum number of users</b>	Up to 300	✓	✓

## PLUS - new security and compliance features in Microsoft 365

Microsoft 365 has also been updated to include a range of new security and compliance features, to cater for new data privacy regulations and the ever-increasing risk of cyber-attack. **These include:**

### Cyber threats

#### Office 365 Advanced Threat Protection<sup>1</sup>

- Attachment scanning and malware detection to catch suspicious attachments
- Link scanning/checking to prevent users from clicking suspicious links.

#### Windows Exploit Guard Enforcement

- Preventing devices from ransomware and malicious websites at device end points.

### Safeguard sensitive information

#### Data Loss Prevention<sup>2</sup>

- Deep content analysis to easily identify, monitor, and protect sensitive information from leaving org

#### Azure Information Protection P1

- Controls and manages how sensitive content is accessed.

#### Intune availability

- Protecting data across devices with E2E device and app management.

#### Exchange online archiving

- 100GB archiving and preservation policies to recover data or remain compliant.

#### Bitlocker enforcement

- Encrypt data on devices to protect data if device lost or stolen.

### Back-end

#### Hybrid Active Directory Deployment<sup>3</sup>

- To support customers with on-premise infrastructure.

1. O365 ATP for email available now. Word, Excel and PowerPoint support coming soon. 2. DLP Policy Tips and IRM in Outlook coming soon. 3. DJ++ guidance and technical documentation coming soon.
