

BRENNAN IT

SECURELY RUN AND GROW YOUR BUSINESS WITH MICROSOFT 365

Why the modern workplace needs Microsoft 365, and how Brennan IT can help your business unlock the core benefits.

BRENNAN IT

The way people work has changed. The modern worker expects to be able to access company data, share information and communicate with colleagues and clients from anywhere, and from any device. And to drive competitive advantage and lasting customer relationships, you need your people to have the latest cloud-based productivity and collaboration tools at their fingertips.

However, this vital increase in mobility can be a major headache for IT teams who are tasked with maintaining disparate and ever-changing technology. And of course, new data regulations and the increasing risk of cyber-attack means you need to ensure watertight security and flawless data compliance.

Fortunately, Microsoft 365 offers a simple solution. Integrating Office 365, Windows 10 and Enterprise Mobility and Security, Microsoft 365 offers a new, intelligent and secure way to empower your people and create a truly modern workplace.

Microsoft 365

Windows 10

- Simplified device management with enterprise level security features.
- Tools for ease of management and deployment.
- Range of tools for improved productivity, including the iconic start menu, Live tiles and Universal Windows.

Office 365

- Flexible and familiar solutions.
- Work on any device, from anywhere.
- Enjoy greater control over data security with in-built privacy, transparency and refined user controls.
- Stay on top of your work with online access to your files.

Enterprise security and mobility

- Sophisticated identity and access management
Multi-factor authentication.
- Mobile device management thanks to InTune.
- Range of smart threat protection measures to defend against cyber-attacks and security breaches.

BRENNAN IT

Get more done

Increase the speed and effectiveness with which your people work, by giving them a range of intelligent tools built into their familiar Office software, along with enterprise grade email and file storage:

Intelligent tools

Work on the go

Access to all your files online

Work better together

Enable your people to collaborate, share and communicate with flexible tools that go where they go.

Work anywhere from any device

Build your business

Get more customers and improve the efficiency of your business' operations.

Build stronger customer relationships

Schedule appointment with your customers

Optimise your business planning

Safeguard your business

With new data regulations both in Australia and Europe, the need to protect client data and company data from cyber-attacks is becoming increasingly vital. IT teams need to balance seemingly competing priorities: rigorous security and employee mobility and efficiency.

Protection from threats

Protection from data leaks

Control data access

BRENNAN IT

The risk of cyber-attack is increasing constantly, and evidence suggests **small-to-midsize businesses are the most vulnerable.**

43%

of cyber-attacks target small business¹

60%

of attacked SMBs go out of business within 6 months²

\$275k

is the average cost of a cyber-attack in Australia³

72%

of SMB owners feel vulnerable to cyber-attacks.⁴
