OUR NETWORK PORTAL

Visibility into performance and potential problems, before they happen, is crucial as business data networks begin to play an increasingly critical role in operations.

As part of Brennan IT’s Managed Network Devices offering – whereby you can outsource the management and monitoring of your network to our highly-skilled engineers - we also provide you with insights into your network’s performance through our Network Portal.

Brennan IT’s Network Portal is a real-time network management, monitoring and charting platform hosted and managed by us.

This platform contains network devices under our management only and includes both our wide area networking or internet services routers (CPE), along with any other managed network devices such as LAN switches, firewalls and WLAN access points.

This web-based network performance monitoring tool allows you to easily visualise your network traffic flows and proactively monitor the performance of your devices across even the most complex IT environments.
**IMPORTANCE OF NETWORK MONITORING**

- **THE SIZE OF THE NETWORK PERFORMANCE AND MONITORING DIAGNOSTICS TOOL MARKET WAS ESTIMATED TO BE $2.2 BILLION IN 2017, GROWING AT A COMPOUND ANNUAL GROWTH RATE (CAGR) OF 1.8%.

- **NETWORK MONITORING IN THE APAC MARKET IS EXPECTED TO PROGRESS AT THE HIGHEST CAGR DUE TO INCREASES IN SMARTPHONES, CONTINUED ROLLOUT OF CELLULAR AND BROADBAND NETWORKS AND INCREASES IN CLOUD-BASED SOLUTIONS AND IOT.**

  Source: Gartner’s Survey ‘Address Security and Digital Concerns to Maintain Rapid SD-WAN Growth’

- **58% OF ENTERPRISES ARE OUTSOURCING AT LEAST SOME ASPECTS OF NETWORK MANAGEMENT - AN INCREASE OF MORE THAN 20% SINCE 2014.**

**KEY PERFORMANCE TOOLS/CAPABILITIES OF NETWORK MONITORING**

**FEATURES & BENEFITS**

- **24/7 VISIBILITY**
  - Our web-enabled Network Portal pulls live data, ensuring you’re able to see the status of your network at all times

- **CAPACITY MANAGEMENT**
  - Enables you to plan your network for utilisation, bandwidth, operations, availability and other network capacity constraints

- **PROACTIVE ERRORS**
  - We proactively fix errors that are hardware failures, hard down and/or mini-link errors – freeing you up so you don’t have to worry about your network’s reachability

- **COMPLETE MONITORING**
  - Whether your network is on-premise, cloud-based or a hybrid of the two, you’re able to monitor all of your assets and devices so you have one overall view of your networks/sites
NETWORK PORTAL OVERVIEW

The Brennan IT Network Portal gives you detailed insights into:
- All nodes under Brennan IT management
- Reachability status from our monitoring platform
- Vital statistics

To access the Network Portal
2. Log in using your Brennan IT credentials.
3. Once on the Home screen, click on the tile called Network Portal and you will be directed to the Network Portal homepage where you’ll see an overview of your network’s metrics and health, geographic view of devices and various nodes.
4. In the top left hand corner, click on the Views tab to see the various insights and analytics available to you.
WHY BRENNAN IT FOR HYBRID NETWORKING SERVICES

HYBRID APPROACH. We understand that every business is different and so is their IT architecture and environment. Our solutions are completely customisable and can be tailored to meet your precise needs.

SECURITY IS CENTRAL. Security has and will always be a top priority for us; so much so that we have embedded security into our entire product portfolio and have achieved ISO 27001 certification for Information Security Management Systems (ISMS).

FUTURE-PROOF NETWORK. Don’t worry about technology obsolescence and the need for ongoing technology refreshes; we’ll adopt the latest technologies, lowering the risk of deployment, whilst future-proofing your entire network environment.

GET COMPLETE VISIBILITY. When you invest in Brennan IT’s Managed Network Services, you’ll get a clear picture of exactly what’s happening across your organisation’s network. Through our Self-Service Portal, you get complete visibility over your network including: node status, interfaces, ports, system health events, CPU, memory, bandwidth, and configuration status.

WE GIVE YOU TIME BACK. Delivered and managed by highly-qualified and experienced engineers, we provide you with end-to-end network management services including: network connectivity, proactive monitoring and 24/7 support. This frees you from having to spend time and resources on building and maintaining your own network.
Voted Australia’s
**No.1 Managed Services Provider**
for the past 10 years.

For 20 years we’ve been committed to making our clients’ lives easier. It all started with a realisation that Australian businesses could be so much more - if only they were able to leave IT to the experts and focus on what they do best: their business.

We do it by offering the mid-market exactly what they need: professionalism, know-how, simplicity and the same passion for their business as they have.

We can help you to:

- Manage & innovate with technology
- Adopt & do more with Hybrid IT
- Better support your workforce
- Connect your business & teams
- Secure & protect your organisation
